

AUTOMATIC NOZZLES

sales@protektfire.com.tw
www.protektfire.com.tw

Style 324

- Automatically adjusts to fluctuating water flow to maintain effective pressure and a consistent stream in all flow ranges
- Adjustable from straight stream to fog pattern
- Nozzle flushes easily without shutting down and provides constant flow on either for or straight stream
- Flow pattern detents facilitate positive positioning and smooth action
- Extensive range of flow settings
- Slide valve control changes flow setting without affecting stream quality
- Hardcoat anodized alloy construction
- Moulded rubber bumper with fixed fog teeth
- Suitable for foam application and compatible with Protek's foam aeration tubes

Style 324-TP

Specification

Style	Inlet Size	Length	Weight	Flow Settings	
			Lbs (kg)	GPM	LPM
324	2-1/2"(65mm)	12.6" (320mm)	7.5 (3.4kg)	50-350	190-1325
324-TP	2-1/2"(65mm)	15" (381mm)	10.6 (4.8kg)	50-350	190-1325
